

# GXS Trading Grid® Enterprise Gateway

## Delivering on the Promise of a Single Integration Platform— The 8th Generation of Enterprise System

Trading Grid Enterprise Gateway from GXS is the groundbreaking solution for companies that want to achieve 100 percent integration with systems and trading partners—inside and outside the four walls of the enterprise. A strategic partnership between GXS and Software AG's webMethods Solution<sup>1</sup> allows GXS to introduce the 8th generation of Enterprise System—providing the right blend of B2B integration software and transaction services—enabling you to maximize your existing infrastructure and effectively control interactions with trading partners and information such as forecasts, orders, shipments and payments.

## Single Integration Platform for a High Performance Supply Chain

### A Consolidated Platform for Managing Business Integration

Mergers and acquisitions, rapid organic growth and general business unit autonomy has put IT managers in difficult situations in which they must maintain operations and staff to run a wide variety of disparate integration systems and networks. Enterprise Gateway provides a simple, unified platform with a common technology platform inside and outside the four walls of your enterprise. This allows you to simplify business integration, while reducing operating costs for supply and demand chain management.

### Real Time Business Visibility & Optimization

Would you want to be alerted if a customer that averages 50 orders per day suddenly drops to one? What if a key supplier is not filling orders in time to meet your customer demands? Enterprise Gateway enables you to proactively create, monitor and improve your critical business processes, giving you the ability to anticipate and prevent problems in your supply or demand chain before they actually happen. An intuitive user interface makes business process modeling simple, even for non-technical users, and sophisticated analytical tools provide real-time visibility into your business operations. This moves your organization toward a high performance supply chain and increases your overall business performance.

### Full Trading Community Connectivity

The escalating importance of delivering business value from the extended supply chain requires significant resources for global trading partner set-up, a broad range of transaction and connectivity methods, and global customer and trading partner support. Enterprise Gateway gives you immediate access to over 30,000 trading partners in over 50 countries on the GXS Trading Grid, the global integration platform enabling and streamlining cross-enterprise business processes. This ensures that you maximize the return on investment by integrating with your entire trading community.

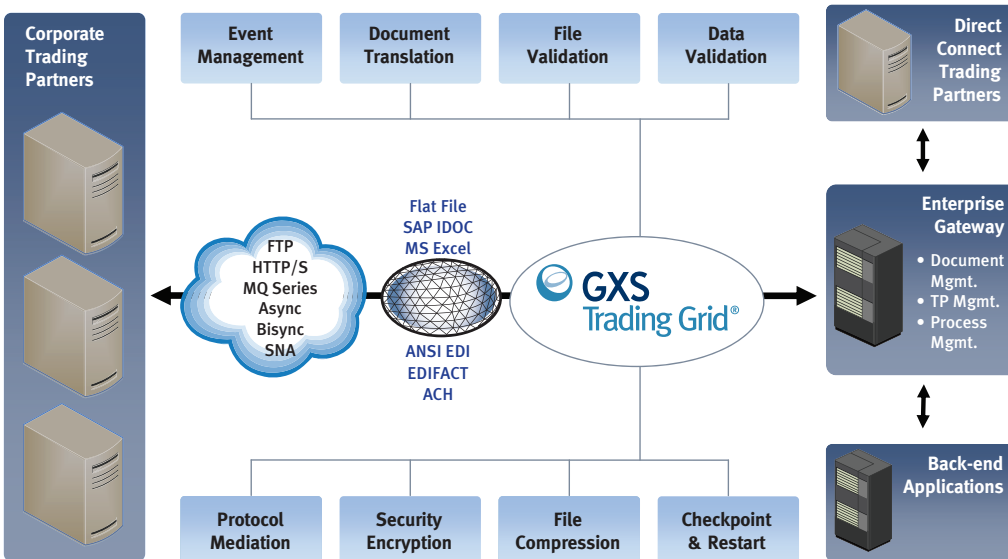

### THE ENTERPRISE GATEWAY DIFFERENCE

- World Class B2B Integration Suite—A Single Platform Across Your Business
- High Performance Data Translation
- Business Activity Monitoring—Inside and Outside Your Enterprise
- Pre-Configured Integration to GXS Trading Grid—30,000 Trading Partners

<sup>1</sup>: Software AG acquired webMethods in 2007 and they now offer one of the industry's broadest range of Service-Oriented Architecture based business integration solutions.
