

## Product Profile

# Edisoft<sup>®</sup> Merchant<sup>™</sup>

## Complete Back-Office Integration

### Provides Seamless Back-Office Integration

Edisoft Merchant is a software solution that allows you to send and receive business documents electronically (such as purchase orders and invoices) to and from your business partners with transparent integration to your back-office accounting system. The solution offers built in communications, data translation, advance ship notice (ASN) and barcoding capabilities. As a result, small and medium-sized businesses now have a cost-effective way of complying with their larger customers' e-commerce requirements.

### Automates the Order-to-Invoice Process

Edisoft Merchant reads and writes directly to your accounting order entry system. The solution routes incoming electronic orders to your system, automatically converting standard invoices into electronic transmissions and performing all further processing—just as if those orders were keyed in manually. A complete electronic data interchange (EDI) solution, Edisoft Merchant includes:

- Integration with a number of accounting systems including ACCPAC<sup>®</sup>, Great Plains<sup>®</sup> (without programming), MAS90/200<sup>®</sup>, and MAS500<sup>®</sup>
- An extensive library of easy-to-maintain, pre-configured trading partner kits
- Data transformation/translation
- Support for all major value-added networks, the Internet and private point-to-point connections
- The capability for unattended “send” and “receive” of EDI documents
- Simple user-driven mapping capabilities
- Powerful and flexible ASN/barcoding capabilities
- Complete audit control and reporting
- Remote warehouse module
- Compliance checking and translation
- Import and export capabilities

### A Complete Solution

Edisoft Merchant offers users a “one click” solution for seamless integration. Edisoft Merchant:

- Helps to eliminate manual entry and re-keying of data
- Improves process productivity among trading partners
- Reduces errors, cycle time and time to market
- Reduces the complexity of EDI trading
- Helps to eliminate the need to import and export data for EDI
- Helps to eliminate redundancy and reduces costs
- Reduces barriers for trading partner participation
- Increases data accuracy and reduces rework

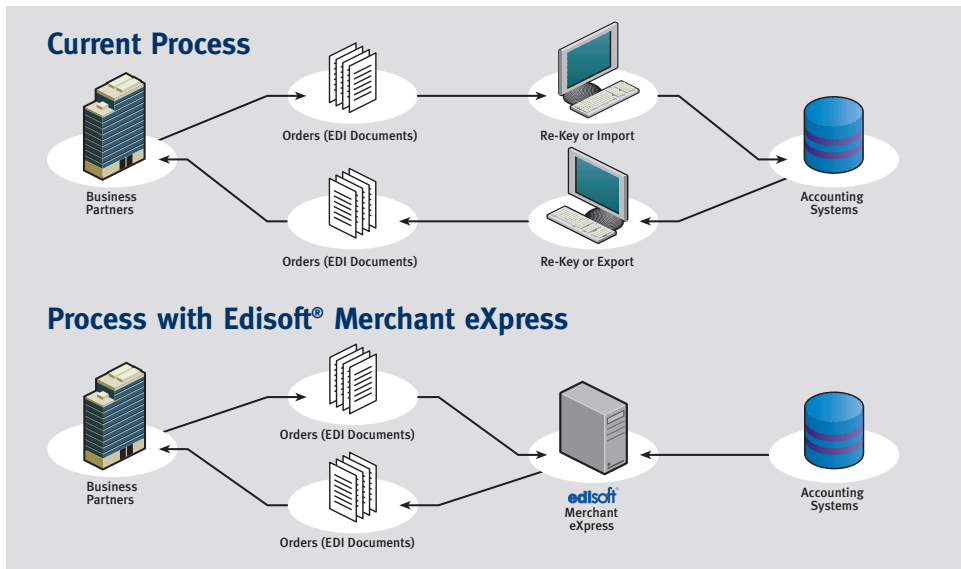

**Edisoft Merchant is a cost effective solution for integrating back-office accounting packages with EDI**

#### KEY BENEFITS:

- Helps to eliminate re-keying, thus reducing time and errors
- Speeds program compliance with proven trading partner kits
- Helps to eliminate on-site programming and/or bridge macros
- Reduces the complexity and increases the accuracy of EDI trading

- Reduces implementation time
- Helps to eliminates on-site programming and/or bridge macros

## Add-on ASN and Barcoded Modules

The ASN Module improves shipment accuracy by providing integrated, automatic ASN capabilities. With this module, you benefit from automated packing, cloning, item grouping, pooling of items on orders and support for data from external applications (including hand-held scanners). The Barcoded Print Label Module integrates warehouse barcoding with the ASN to ensure data accuracy and integrity. It produces UCC128/MH10 shipping labels that can be scanned to expedite the entire shipping and receiving process.

## About GXS
